

# HOW DOES JAXIS VENDING WORK?

We strive to provide the most seamless and effortless business model for the businesses that we partner with.

## Swipe, Grab & Go!

- The machines operate on a "Swipe, Grab, & GO!" methodology. Essentially, once a card is swiped on the machine, the machine will unlock and allow you to take whatever you want from the machine.
- At the completion of your transaction, simply close the machine and walk away (optionally enter your email for a receipt). This will lock the machine and charge for only what has been taken from the machine.

## We Buy The Machines!

- There is NO UPFRONT costs for landlord.
- Jaxis Vending will order the machine, ship directly to the property, install and maintain the machines are fully operational from day one.
- We cover all costs associated with inventory and stock and will ensure proper levels are maintained. If you have any suggested products we can explore stocking that as well!

## We Stock The Machines!

- We handle everything from stocking and ensuring each machine placed maintains adequate stock to service your tenants, their guests, and the leasing staff.
- Each item in the machine is individually tagged which enables our "Swipe, Grab, & GO!" methodology.
- When stock is running low, we will be notified and know what needs to be replenished in the machines automatically.
